## edaWorkshop Proceedings

To devise the edaWorkshop program of presentations, posters and demonstrations a program committee reviews submitted contributions by category. Accepted contributions are published as a paper in the edaWorkshop proceedings, which will be published with an ISBN. The proceedings do not distinguish between poster, presentation and demonstration contributions – all contributions are equally important to our common goal. The whole proceedings of each year and every paper of it can be ordered at the [VDE-Verlag](#) <sup>[1]</sup> (following the link).
