## ADVISORY/Nassda's CEO Sang Wang to Present at the edaForum02

- (BUSINESS WIRE)--Nassda Corp. (Nasdaq:[NSDA](#))

Who: Nassda Corp. (Nasdaq:[NSDA](#)) announced today that CEO Sang Wang will be a featured speaker at edaCentrum's edaForum02

When: December 5-6, 2002

Where: Radisson SAS Hotel, Hannover, Germany

Presentation: December 5, 2002  
Technical Session 1 (3:00 p.m.-6:30 p.m.)  
Nassda's Sang Wang, CEO presents;

"ROI from Nanometer IC Circuit Verification"  
The investment cost in nanometer IC projects continues to increase at a rapid pace. When nanometer manufacturing processes impose new parasitic effects in complicating the design and verification of complex ICs, full-chip circuit simulation, verification and analysis is becoming highly necessary for project success and good ROI.

### About Nassda

Nassda Corporation (Nasdaq: [NSDA](#)) is a fast-growing provider of full-chip circuit verification software for complex nanometer semiconductors. Headquartered in Santa Clara, California, the company develops and markets simulation and analysis solutions for advanced ICs, especially for analog, memory, and mixed-signal SoC designs. Nassda's products enable first silicon success, and improve product quality and production yield for its consumer, communication, computer, and memory customers. The company has sales and distribution offices throughout the world. For more information about Nassda, please visit the company's website at <http://www.nassda.com>.
