## Welcome to edaWorkshop13 website - prog online

The edaWorkshop is the premier German EDA event for the publication and discussion of application-oriented EDA research findings. The mix of representatives from industry and research creates ideal opportunities for a professional exchange of ideas on a scientific basis. The dialog can pave the way for industry to benefit from research results.

**Since the beginning of March the program is online and the registration is open.**

edaWorkshop is also the primary platform for presenting and exchanging solution approaches and results of EDA projects funded by the BMBF (German Ministry of Education and Research). It promotes communication between EDA experts and public authorities, and supports the dissemination of the results of publicly-funded projects. ([more Information](#) <sup>[1]</sup>)

The upcoming edaWorkshop will be held on **May 14 - 16, 2013 in Dresden, Germany**

**It will be jointly organized with the annually CATRENE Design Technology Conference (CATRENE DTC).**

The successful [preceding edaWorkshop events](#) <sup>[2]</sup> attracted more than 120 participants in 2009 and 2011 respectively. To get an impression of edaWorkshop visit the [picture gallery](#) <sup>[2]</sup> of the past events.

You will have plenty of opportunity to bring your topics and results to the edaWorkshop. Just take it.

**We are looking forward to welcome you in Dresden!**
