CST University Publication Award 2009: Winners announced

The CST University Publication Award is an annual grant to university institutes and researchers for their work in the application of 3D EM field simulation. The winners are awarded with extensions to their CST STUDIO SUITE installations.

Prerequisites for participation are that the papers are authored or co-authored by university researchers, published either in scientific journals or conference proceedings, and the numerical results are entirely or in part obtained through simulation using CST software products.

Submissions were evaluated on a number of criteria including originality of the application or the theory, clarity of presentation, as well as the skilful usage of CST software features. There is a special award for short papers which acknowledges the importance of short conference papers in promoting the practical application of simulation.

Globalfoundries

Globalfoundries bietet Kunden ab sofort weltweit Full-Service-Fertigung

Die ehemalige Fertigungssparte von AMD, die als Firma Globalfoundries mehrheitlich im Besitz der Investmentfirma Mubadala ist, hat den Halbleiterbauelemente-Auftragsfertiger Chartered Semiconductor aus Singapur integriert. Nach Angaben der beiden Unter-
