electronic design automation centrum

edacentrum

Benefits for edacentrum members

1. Receiving information material
- newsletter edacentrum
- Reports on technical trends
- Analytical reports and background information
- Conference reports
- Reports on market trends and market analysis
- Material on current funding projects (BMBF, EU, ...)
- Material on planned funding activities
- Conference calendar

2. Consulting
- Realization of funding projects
- Creation of project consortia
- Problem solving for small and medium-size enterprises

3. Mediation
- Specification of requirements for EDA research
- Contacts with centers of expertise for cluster research projects
- Contacts with EDA companies
- Exchange of information with different EDA users
- Arranging classes for extended vocational training and providing teaching material

4. Miscellaneous
- Use of edacentrum infrastructure for workshops or other activities
- Publication by academic or general publishers
- Representation in the EDA Consortium (EDAC)
- Reduced fees for workshop participants

electronic design automation centrum

Benefits for edacentrum project partners

1. Preparing Projects

- Assistance in identifying and determining problems which are waiting to be solved on a national and international level by using funding
- Preparing research & development projects with other experts
- Support for setting up appropriate project consortia
- Detailed information on current and future funding activities
