TRACE present in the EF ECS2018 in Lisbon

2018/11/26

November 20th – 22nd: TRACE presented its status and the project results at the EF ECS (European Forum for Electronic Components and Systems) in Lisbon. Many interested parties and also stakeholders visited the well-equipped booth during the numerous exhibition periods and the breaks. The navigation demonstrator was on site together with many more electronic components and circuits developed in TRACE. The team at the booth provided printed information, promotional gifts were in great demand, and video and slideshows complemented the meetings and discussions with all our visitors. Our thank goes to the Catrene office for their support.

The TRACE project (project label 16ES0488K-16ES0502, 16ES0737) is supported by the German Federal Ministry of Education and Research (BMBF).
