TRACE support Kickoff for VDE-ITG Expert Group "Platform for Automotive Semiconductor Requirements along the Supply Chain"

2019/05/17

On June 27 and 28 the kick-off event for the new VDE-ITG Expert Group MN5.7 "Platform for automotive semiconductor requirements along the supply chain" [VDE ITG MN 5.7] will take place in Frankfurt at the VDE. Information and registration can be found [here](#) [1].

The TRACE consortium is very pleased that we have been able to initiate this technical committee. With the Informationstechnische Gesellschaft of the VDE, we have another important technical organization in which we can introduce the TRACE methodology into an expert group and standardization work and then implement the results of our project sustainably and concretely in the direction of standards.

Das Projekt TRACE wird unter dem Förderkennzeichen 16ES0488K-16ES0502, 16ES0737 durch das Bundesministerium für Bildung und Forschung (BMBF) gefördert.
